

# FAST ACCURATE RELIABLE. COMMUNICATIONS | CABLE TV | FIBER | TESTING PRODUCT MANAGER UPDATE

## **Live View (Optional Feature)**

Live view which is ready in seconds, provides technicians with a living breathing view of the Wi-Fi® environment. Enabling technicians with a much needed design and troubleshooting tool that also ensures a Smart Home Zigbee® network performs seamlessly.

#### Live Access Point View

Enables technicians with a live view of the neighboring Access Points, the channels used as well as their configuration. This enables technicians with a quick snapshot of the Wi-Fi environment and can be used as the 1<sup>st</sup> step in a planning and troubleshooting tool.

#### Live Channel Utilization & Interference

The 2<sup>nd</sup> step in planning or troubleshooting Wi-Fi is understanding channel utilization and interference across all channels in both the 2.4GHz & 5GHz bands. Live mode enables the technician with the visibility into how busy a channel is carrying Wi-Fi traffic; and at the same time differentiates it with the effect any interference might have on that same channel. Interference includes co-channel as well as adjacent channel interference along with non-Wi-Fi interference.

## **Zigbee®** Optimization

With the exponential growth in home automation and security offerings using Zigbee, Airscout Live Mode has the ability to guide the technician on what Zigbee® channels should be disabled so as to avoid the primary Wi-Fi® network thereby optimizing the in-home wireless network to work seamlessly throughout the home.

## **ORDERING INFORMATION**

Cat No.	Description				
<u>ASL300</u>	Master Only with Live Mode (Soft case & charger incl)				
<u>ASL</u>	Upgrade ASK302, ASK304 or ASK306 to enable Live Mode				
ASL302	ASK302 Kit with Live Mode Enabled.				
ASL304	ASK304 Kit with Live Mode Enabled.				
<u>ASL306</u>	ASK306 Kit with Live Mode Enabled.
